

# BINOMED GmbH

RESEARCH, DEVELOPMENT, MANUFACTURING  
OF MEDICAL AND VETERINARY PRODUCTS

- BINOMED GmbH was founded in 1999 in Germany, and specialises in the development and manufacture of innovative, biotechnology-based medical products. Our following products have been registered in many countries worldwide:
  - Polivac-TM, Polivac-T, Insol®Trichophyton, Insol®Dermatophyton, Insol®Microsporum, BINOVAC®IDD for the treatment and prevention of infectious and non-infectious skin diseases, including Albican®, Binover®, Binolbin® for the treatment and prevention of allergies
  - Animal care products line: BINO®Spray, BINO®Bellii
- BINOMED GmbH researches and develops newest pharmaceutical products:
  - BINO®Clean for the treatment and prevention of myco-carriers in animals
  - For the treatment of infectious diseases without antibiotics in cows, horses, cats and dogs
  - BINO®Reprostim for reproduction regulation in cows
- BINOMED GmbH participates in and conducts the registration of new medicinal veterinary products, developed in Germany and other countries (over 45 different medicinal veterinary products have been registered)
- BINOMED GmbH has established its own production facilities and manufactures active ingredients

## OUR SCIENTIFIC ACTIVITIES, PATENTS AND INNOVATIONS

- We publish research papers and articles in national legislative acts:
  - More than 115 papers by Doctor of Science Lyudmila Ivanova, and more than 120 papers by Doctor Igor Polaykov, including the first description and identification of one species and one subspecies of the dermatophyte pathogens (diseases common to both humans and animals)
- Our inventions and patents:
  - Ten patents and inventions
  - Of which five are international
  - Introduction and implementation of seven products related to the patents and inventions
- We have organised and operate a laboratory for working with pathogenic microbes and fungi (L2), which is licensed in Germany
- We participate in the introduction of new technologies in the field of animal reproduction.
